

right now

we know our user members
want companionship

we're great at offering care &
support and want to engage
more with our community

care team are clear that
more capacity is needed to
make this happen

we need to work towards
common ground around
safeguarding and risk
management

current way forward

funding application for
a pilot/mapping project

co-operating with Gill from
Watershed - creative
engagement; having Simon's
support (from Torbay)

the community work
establishes and works
independently

current user members & staff members
aware & able to take part and benefit from
activities/extra resources as and when

future

we'll get better
knowledge of
our community
& engage with
our members
better

we'll be
neighbourly
together and
can take next
steps (e.g.
further
funding)
